

Chapter 3 -June 11th 2022

It's now June 13, 2022 and lots has happened. The Fairies are presently moving into their new cabin. I call it a cabin because it's made of Wood & Glass and looks like a cabin. The first "cabin" was made of Cardboard.

That never worked because after the 2nd or 3rd RAIN it was caving in. Fallen down....

The next one was a little smaller but made of wood & has Glass SKY Light & a Glass Door so kids can look through the Sky light & see what's inside while their mom used her phone's flashlight to make it brighter by shiny it in front door. Kids can look in and identify what's inside. Have you identified anything?

The Gnomes built a bigger cabin with a HUGE SKY LIGHT and a bigger Glass Door that when a Parent uses their "phone's Flashlight" to shine in through the GLASS door, the Kids see everything in the Room.....

Can you identify any of those items in this large Cabin?

While the Gnomes were building this Cabin, they discovered rusty Nuts & Washers under the cabin. At least 100 or more. It's like the

Tree 'pushed' them away as it grew larger and more round. The Gnomes thought they might be part of a Treasure....buried next to the Tree! They will check into that later???

Also one night it got awful wet inside, they had leaks, so the gnomes used "plumbers putty" to seal the leaks. The next night it was still wet.

They checked and they hit WATER Table so the Gnomes brought in a Water pump and installed that, now the fairies have indoor plumbing inside their large cabin.

CAN YOU SEE the Water Pump?

Fairies really live inside the Tree just like the Gnomes. Can you see where the door is on the big cabin?

I think that are having FISH Tonight because they have a Fish on the Table. I also see a TEA POT? Do you see a Tea Pot?
